

BHUMIL PARATE

Full Stack Developer

+1 (382)885-3109 | bhumilparate944@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Experienced Full Stack Developer with around 3+ years of experience. Delivering scalable web applications using Java, Spring Boot, Spring Cloud, and React.js, with strong expertise in microservices architecture, REST APIs, and database optimization across SQL and NoSQL systems. Collaborating in agile teams to build secure, cloud-native solutions using Microsoft Azure, Docker, Kubernetes, and implementing robust authentication, testing, and CI/CD practices to ensure high-performance, reliable applications.

SKILLS

Programming Languages: Java (Core Java, Java 17), SQL, JavaScript (ES6+), TypeScript

Frontend Technologies: React.js, TypeScript, HTML5, CSS3, Responsive UI Design

Backend Technologies: Spring Boot, Spring MVC, Spring Cloud, Hibernate, JPA, RESTful APIs

Microservices & Architecture: Microservices Architecture, Distributed Systems, API Design, Service Discovery, Event-Driven Architecture (Kafka)

Databases: PostgreSQL, MySQL, MongoDB, SQL Query Optimization, Data Modeling

Cloud & DevOps: Microsoft Azure (App Services, Azure SQL, Blob Storage), Docker, Kubernetes, CI/CD Pipelines, GitHub Actions, Jenkins

Security & Testing: Spring Security, OAuth2, JWT, JUnit, Mockito, Selenium, API Testing (Postman)

Tools & Collaboration: Git, GitHub, JIRA, Agile/Scrum, Azure Monitor, Logging & Monitoring (CloudWatch), Stripe API, PayPal API, Shopify API, Amazon API

EXPERIENCE

Full Stack Developer | SIEMENS | CANADA

Aug 2025 – Present

- Developed backend microservices for a smart energy and IoT monitoring platform using Java 17, Spring Boot, Spring Cloud, enabling real-time data ingestion and improving grid reliability by 35% through faster fault detection.
- Built and optimized RESTful services using Hibernate, JPA, PostgreSQL, SQL, and collaborated with frontend teams using React.js, TypeScript, reducing data latency and improving dashboard responsiveness by 28%.
- Strengthened application security by implementing Spring Security with OAuth2 and JWT, ensuring secure API access across distributed systems and reducing unauthorized access incidents by 40% in production environments.
- Deployed and managed scalable applications on AWS (EC2, S3, RDS, Lambda) using Docker and Kubernetes, improving system availability and reducing downtime by 30% across microservices-based architecture.
- Processed and monitored real-time data streams using Apache Kafka and AWS CloudWatch, enabling early anomaly detection and improving predictive maintenance efficiency by 25% across energy and industrial systems.

Backend Developer | LUCKIMEDIA | INDIA

Jan 2021 – Dec 2023

- Developed scalable RESTful microservices using Java, Spring Boot, Spring Cloud following MVC architecture, improving API response times by 40% and enhancing maintainability across distributed backend systems.
- Strengthened API security by implementing Spring Security, OAuth2, JWT with role-based access control and validation layers, reducing unauthorized access incidents by 30% across enterprise-grade application environments.
- Optimized database performance using Hibernate, JPA, MySQL, MongoDB, improving query efficiency and indexing strategies, resulting in 35% faster data retrieval and improved transactional consistency.
- Engineered payment processing workflows by integrating third-party REST APIs for Stripe, PayPal, Shopify, and Amazon services, reducing transaction failures by 25% across scalable e-commerce platforms.
- Deployed and managed microservices on Microsoft Azure (App Services, Azure SQL, Blob Storage) using Docker and CI/CD pipelines, reducing release cycles by 40% and improving production stability.
- Improved system performance by analyzing production issues using Spring Boot Actuator, Azure Monitor, optimizing APIs and database queries, reducing recurring defects by 28% and increasing application uptime.
- Built scalable marketplace features using React.js, TypeScript integrated with Spring Boot APIs, improving user experience and increasing platform adoption by 20% in multi-tenant distributed systems.

EDUCATION

Graduate Certificate in Web Design & Development

Conestoga College | Canada

Aug 2025

BTech in Information Technology

GTU | India

Jul 2021
